SUMMARY

Skilled in developing stand-alone and distributed applications using **Java, MySQL, JPA**, and the **Spring Framework**. Eager to kickstart my career as a Java Developer and apply my knowledge to tackle real-world challenges. Quick learner, team player, and highly motivated to contribute to a dynamic and innovative work environment.

SKILLS AND TECHNOLOGIES

- Java, HTML, CSS, Javascript, MySQL
- Spring Boot, Spring Framework, Rest API, Microservices
- Hibernate, Lombok, slf4j, Log4j, Apache Tomcat, Apache Kafka
- Eclipse, IntelliJ, STS, Git, Docker, Postman

PROJECTS

1. Weather Forecast Web Application

Developer

The Weather Forecast Web Application is a user-friendly platform developed using Spring Boot, REST API, and an open-source weather API. It offers an intuitive interface to fetch weather conditions for a specific city, providing hourly forecasts for the next day.

Technical Stack:

- Java, Spring Initializer, Spring Boot, Maven, Rest Api, React, Javascript

2. Hotel Review Microservices Web Application

Developer

The Hotel Review Microservices Web Application is an innovative platform designed and developed using microservices architecture. This application consists of three key services: User Service, Hotel Service, and Rating Service. It enables users to find and review hotels before making bookings, providing valuable insights to enhance their stay experience.

Technical Stack:

- Java, Spring Initializer, Spring Boot, Maven, Rest Api, microservices, Eureka, Spring cloud Api gateway, Spring Cloud Config Server, MySQL, Hibernate

EDUCATION

Bachelor of Technology

National Institute of Technology, Meghalaya *Aug 2016 - Jun 2020*

CERTIFICATION

Java Software Development Course

Great Learning
